5. After the WO/ WP selection, double click a necessary modification for which a procedure should be created.

6. To print out the procedure of a particular modification, highlight it in the list of modifications and click on the Print button.

The screenshot shows the 'Modification Work Order Editor' window. At the top left, there are 'Close' and 'Print' buttons, with a blue circle '10' highlighting the 'Print' button. The main form contains several fields: 'A/C Reg. No.' (LY-STG), 'A/C Serial No.' (29083), 'Modification Work Order Title' (WINGS - FLIGHT SURFACE - LE SLATS - MAIN TRACK DOWN-STOP ASSEMBLY INSPECTION), 'MOD WO Num.' (M201109-L0005-0003), 'OEM Doc Ref. No.' (AD 2008-06-29), 'Customer Doc. No.' (empty), and 'Work Package Description' (TEST NG). Below these fields are checkboxes for various categories: :ETOPS, :DI (Rll), :CRIT, :ALI, :TAT CRT, :CAT 3, :CDCCL, and :EWIS. At the bottom left, there are 'Update' and 'Delete' buttons, with blue circles '8' and '9' highlighting them respectively. The 'Prepared By' field is empty, and the 'Revision Date / Number' is 08/04/2008 / 00. A large text area at the bottom contains the text 'COMPLY WITH INSTRUCTIONS AD 2008-06-29'. A blue circle '7' is positioned on the right side of the window, pointing towards the text area.

7. When you double click a modification, the Modification Editor opens. Write down the whole procedure (you may just make reference to another instruction) and enter a person, who prepares it ('Prepared By' field).

8. To save entered data, click on the Update.

9. To remove the procedure, use Delete.

10. Push "Print" button to print out the MOD WO.
